

YOUNG TECHNOLOGIST SEMINAR

Sponsored by Microsoft O365

Summer 2017

Dates: **June 19th – July 28th, 2017**

Location: **Microsoft Redmond Campus**

Stipend: Participants will receive **\$4,800**

Equipment Needed: **None**. Participants will be provided all appropriate hardware/software.

Program Description

Six-week seminar **focused on productivity, communication and collaboration**. During the first week, students will provide a personal report out on how they use technology and tools in their everyday life. For the remaining five weeks, participants will work together as a team to design and prototype an experience that they've identified as a gap/need. Young Technologists (YTs) will attend weekly hands-on trainings led by senior engineers and program managers designed to enhance existing technical skills as well as teach new ones.

The seminar provides exposure to various tools and programming languages in the field of software development encouraging students to pursue degrees in computer science, computer engineering, or related technical disciplines. **The seminar is centered on exploring Microsoft and the world of technology!**

Our Team

Office 365 is the original command center! Helping people communicate, manage time, prioritize and connect. We are people of action and innovators working in a fun thriving community dedicated to the future of technology and evolution of email. YTs will be part of the O365 team during the seminar.

Young Technologist Qualifications

- Candidates must be a **college freshmen or sophomore** with a demonstrated interest in a related technical major.
- Students must have completed college level **Intro. to Computer Science** (or an equivalent class) and one semester of college level **Pre-calculus** (or equivalent) by the start of the program.
